

**ACADEMIC HEMATOPATHOLOGIST/CLINICIAN SCIENTIST
QUEEN'S UNIVERSITY
KINGSTON, ONTARIO**

The Department of Pathology and Molecular Medicine in the Queen's University Faculty of Health Sciences and its affiliated teaching hospitals is seeking an academic hematopathologist/clinician scientist to fill a position that will become vacant in September 2010 due to retirement.

The successful appointee will be expected to establish an independent research program and contribute to the diagnostic service activities of the Division of Hematopathology. The two major research interests in the Department include cancer biology/genomics and hemostasis/vascular biology. The percent of time allocated to these activities will be negotiable depending upon prior experience and future career research goals. A strong cancer research program is located within the Queen's University Cancer Research Institute (http://qcri.queensu.ca/Cancer_Biology_and_Genetics.html) and a very well recognized hemostasis group with a focus on molecular, translational and clinical investigation of FVIII and von Willebrand factor (<http://clinlabs.path.queensu.ca/queens/labs/lillicrap>) located in Richardson Laboratory.

Scholarship is a major departmental goal and substantial resources are available for the establishment of research programs. The applicant will also be expected to contribute to the department's undergraduate, graduate and residency training programs. Applicants must provide evidence of current involvement in and commitment to education.

Kingston is a community of 120,000 that is situated in a beautiful location on Lake Ontario at the mouth of the St. Lawrence River. It is the fresh water sailing capital of North America and is within easy access of major metropolitan areas including Montreal and Toronto.

Candidates must be eligible for medical licensure in the province of Ontario and must either hold or be eligible for certification by the Royal College of Physicians and Surgeons of Canada in an appropriate discipline.

This is an international search and the University invites applications from all qualified individuals.

Queen's University is committed to employment equity and diversity in the workplace and welcomes applications from women, visible minorities, aboriginal people, persons with disabilities and persons of any sexual orientation or gender identity. All qualified candidates are encouraged to apply; however, Canadian citizens and permanent residents will be given priority. Appointments will be at academic ranks commensurate with experience.

Evaluation of applications will begin immediately and will continue until the position is filled. Applicants should submit a letter of interest and a CV to:

Victor A. Tron MD, Professor and Head, Department of Pathology and Molecular Medicine, Queen's University, Kingston, Ontario K7L 3N6 (Tel): (613) 533-2850; (Fax): (613) 533-2907; E-mail: tronv@queensu.ca, (electronic submission preferred). URL: www.path.queensu.ca
